Develop The Web Application Using Node-RED

Aim:

Develop the web application using Node-RED.

Steps Followed:

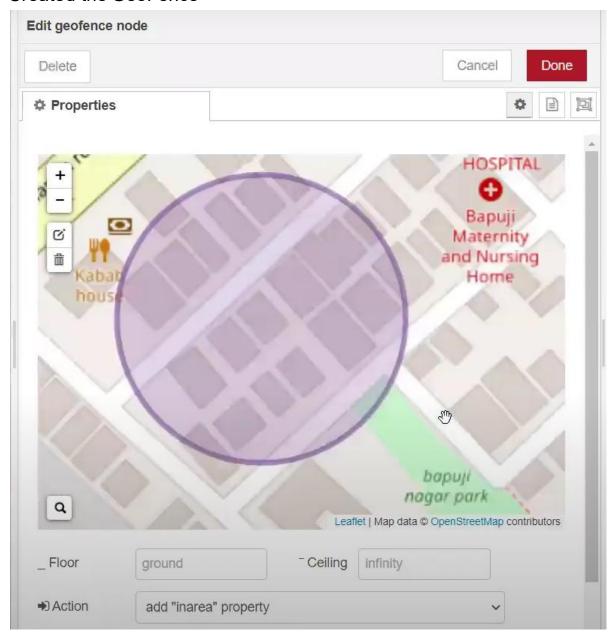

• Opened a Node-RED project

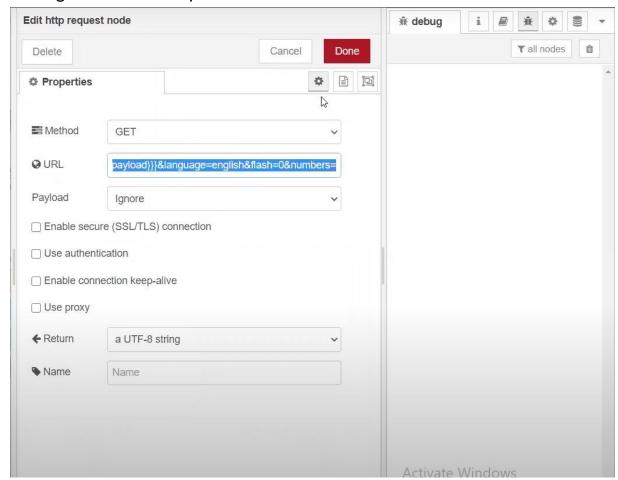

Added code to get child location in python

```
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
        "orgId": "hj5fmy",
"typeId": "NodeMCU",
        "deviceId": "12345"
    "auth": {
        "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
While True:
        name= "Smartbridge"
        #in area location
        latitude= 17.4225176
        longitude= 78.5458842
        #out area location
        #latitude= 17.4219272
        #longitude= 78.5488783
        myData={'name': name, 'lat':latitude,'lon':longitude}
        client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
        print("Data published to IBM IoT platfrom: ",myData)
        time.sleep(5)
client.disconnect()
```

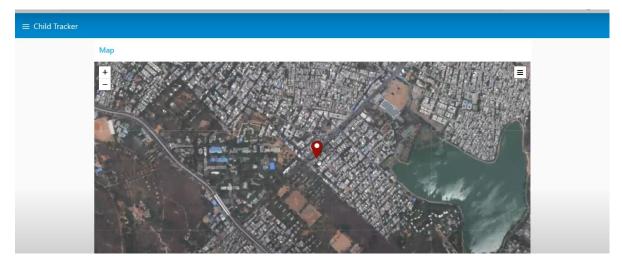

• Created the GeoFence

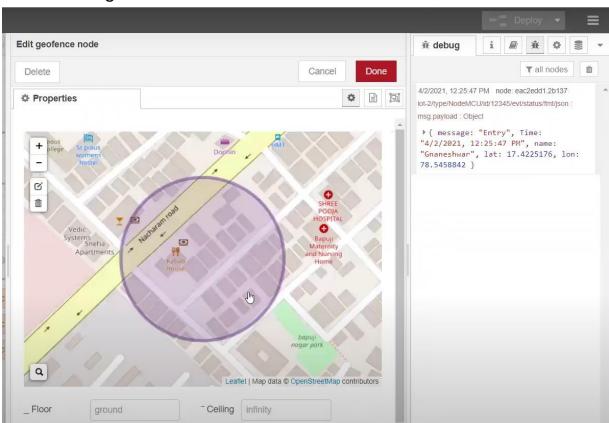

• Editing the HTTP RequestURL

• Located the child

• Created the geofence node

• Python script sending requests to IBM Cloud

```
Console 2/A 🗵
child.py
                                                                                                      Data published to IBM IoT platfrom:
1 import json
                                                                                                      Data published to IBM IoT platfrom:
   2 import wiotp.sdk.device
                                                                                                      Data published to IBM IoT platfrom:
   3 import time
                                                                                                      Data published to IBM IoT platfrom:
                                                                                                      Data published to IBM IoT platfrom:
   5 myConfig = {
         "identity": {
